### **New Code Allows Powered Aire Inc. Air Curtains to Replace Vestibules**

Air curtains installed above doorways protect the openings with a thermal barrier of air each time the doors open. This prevents infiltration of outside air and helps maintain climate control. When used in place of a vestibule, the **ETA** and **CHA** air curtains (unheated or heated) will serve as the first line of defense against the

infiltration of outside air. These models can also be used to make existing vestibules more efficient and comfortable.

Powered Aire Inc., the Greenville, PA based manufacturer of high performance stainless steel air curtains, offers two Air Movement and Control Association (AMCA) certified models that meet the International Energy Conservation Code (IECC) requirements for use in place of a vestibule.
