### Case Study: Updating Fan and Control Technologies in 40-year-old Office Building Reduces Energy Costs 26%

*"The ease of the modular design allowed us to mobilize much quicker and with less rigging time to help keep the estimate down."*

#### BACKGROUND:

Frequent fan failures were resulting in occupant discomfort and loss of productivity for days at a time, and it was challenging to get spare parts to repair the fans.

#### ISSUE:

The building owner wanted a

reliable solution that would improve energy efficiency, could be installed quickly, and would work in the existing space.

#### SOLUTION:

Multiple modular fan FANWALL® arrays were...[click here to read the rest.](#)

### Free Mission Critical Energy Audit

Let Data Aire's experts evaluate your critical cooling system and they will teach you how to achieve maximum efficiency with Data Aire's Technology Upgrade Program

Cooling equipment in mission critical environments, such as data centers, work extra hard – in fact 24/7, 365 days a year – even in the dead of winter. It just makes sense to completely maximize your energy dollars, AND save money on future maintenance and repairs. [Click here to read more>>>](#)
