Indoor Farming and Grow Room Climate Control & Dehumidification

Desert Aire's GrowAire™ Dehumidification Systems are specifically designed for indoor farming and grow room climate control & dehumidification.

These commercial dehumidifier systems feature scalable designs to size grow rooms, commercial greenhouse and indoor farming solutions for peak cooling loads when plants are small; and then regulate humidity levels as plants mature – eliminating the need to purchase separate commercial dehumidification and air conditioning equipment.

Steel tariffs, inflation cause spike in construction costs, AGC says

The prices for many items used in construction, from steel to lumber and diesel fuel, jumped last month at the fastest rate in seven years, the Associated General Contractors of America said.

The U.S. government's producer price index for materials commonly used in construction increased 1 percent in April and are up 6.4 percent over the last year. The spike is the steepest since 2011, the AGC said.

Current market conditions are preventing many firms from passing these cost increases along to customers, said association's chief economist, Ken Simonson. [Click here](#) for the rest of this article.
