Titus Products Catalog

The Titus Product Catalog is the #1 catalog in air distribution. It contains information on Titus products and solutions as well as extensive Engineer Guideline sections on the following: grilles & diffusers, terminal units, fan coils, and acoustics. Chilled beam, displacement ventilation and underfloor air distribution systems are also featured in the Titus Catalog.

How Changing Climate is Changing the Construction Industry

Many parts of the country and all over the world are experiencing climate change. These changes in weather are and will continue to have a prominent effect on the construction industry and on the construction jobsite.

"Climate change" in common usage has come to replace the term "global warming," which in a linguistic manner has not accurately described observed weather conditions. Climate change describes the conditions where global climate variations exceed the norm.
