Whether you want to extend your local season, have a designated smoking area or need to make additional room for peak crowds, the Designer Series' broad offering can provide a solution that will fit your outdoor heating needs. [More>>>](#)

## Interesting Stuff

### Applying Conventional Construction to Custom Metal Buildings

#### Creating innovative design alternatives through mixed construction methods

The old adage, "opposites attract," might as well be describing the increasingly common practice of mixing the technology of custom metal building systems with conventional construction. By taking the indisputable sustainability, time savings, and structural benefits of a custom-engineered metal frame, and then adding in design elements you can only achieve with traditional products such as...[More>>>](#)

### Four Common Mistakes To Avoid When Making A Disinfection Plan

As businesses weigh their options for reopening, many are putting together plans for routine disinfection. But too often, the measures these businesses take fall short. RD Weis is here to help. Here's the four most common mistakes made when creating a disinfection plan - and how you can avoid them.

**1. ONLY WIPING DOWN SURFACES**  
Wiping down surfaces is an excellent start to disinfection. But it's only that...[More >>>](#)
