New in Our Product Line

Dual-Tech®

Weather-proof Outdoor Duct

Dual-Tech pre-fabricated insulated ductwork is offered in both non-union and Yellow Label Union varieties.

- Dual-Tech® carries a 20 year limited warranty
- Dual-Tech® resolves issues that exist with many traditional sheet metal systems with insulation – such as weight, space, installation time, and energy performance.
- Dual-Tech® is ideal for jobs where a non-fibrous solution is desired. The air stream in the sealed duct flows only on aluminum, making it ideally suited for high specification applications
- Dual-Tech®'s **patented system** combined with the fully sealed duct seams produce a system that is **virtually airtight**
- Dual-Tech® yields significant savings in reduced heating and cooling loads due to the superior insulating properties of the phenolic panel and minimal air leakage of the jointing system
- Dual-Tech® offers significant installed cost savings over other insulated sheet metal systems...[See More Features and Benefits>>>](#)

Interesting Stuff

Altering facilities for a post-COVID-19 world

There are several possibilities when it comes to reconfiguring or adjusting a space to maintain the health and safety of workers, from reorganizing spaces to enable social distancing measures to full teardown and reconstruction of a plant.

As companies and organizations bring their employees back into offices and work environments following the self-isolation periods caused by the COVID-19 pandemic, many are struggling to find the safest and most responsible approach to complying with new Centers for Disease Control and Prevention guidelines...[More>>>](#)
