

Detroit Radiant Products Co.

## DR Series

### Gas-Fired, High Intensity Unvented Infra-Red Heaters

The DR Series represents today's most popular line of gas-fired, high intensity, infra-red heaters. This unvented heater is ideal for use in many applications including areas of high air infiltration, high ceilings and spot heating. The DR Series offers exclusive design features, a proven history and a variety of BTU and control options.

#### Product Features

- Exclusive Re-Verber-Ray ceramic burner provides maximum infra-red radiation
- Stainless steel Re-Verber-Ray rods increase heat temperature and efficiency
- Direct spark ignition
- 5-year limited ceramic burner warranty
- CSA Design Certified, UL-listed, accepted by F.I.A. and F.M.

#### Gas Connection

- 1/2" NPT

#### Gas Pressures

- MAN. 6" Nat or 10" LP
- MIN. 7" Nat or 11.0" LP
- MAX. 14.0" Nat or 14.0" LP

#### Venting

- Not available

#### Combustion Air

- Not available

#### Certification

- CSA, ISA

#### Warranty

- 5 year limited ceramic burner warranty

#### Gas Type for Stock Units

- Natural

#### Voltage

- 120V

#### Control Type

- Direct Spark Ignition

#### Amps

- 0.1

#### VA Draw

- 12.0
